FRAMEWORK OVERVIEW

=====

=====

This framework evaluates candidates across 44 universal traits that can be assessed from ANY CV, regardless of industry or job type. Each trait is scored 1-5 based on evidence present in the CV:

- 1 = No Evidence
- 2 = Minimal Evidence
- 3 = Moderate Evidence
- 4 = Strong Evidence
- 5 = Exceptional Evidence

All 44 traits are universal and can be evaluated from standard CV content.
Job-specific weightings are applied separately (see TALENTRATE_JOB_WEIGHTINGS.txt)

IMPLEMENTATION METHODOLOGY

STEP 1: AI EVALUATION

- GPT-4o evaluates candidate CV against all 44 trait definitions
- Each trait receives a score from 1-5 based on evidence strength
- Scores are objective and based solely on CV content

STEP 2: WEIGHT APPLICATION

- Job-specific weightings are applied to raw trait scores
- Different roles emphasize different trait categories
- Weightings total 100% across all traits for each role

STEP 3: FINAL SCORE CALCULATION

- Weighted trait scores are summed
- Result is normalized to 0-100 match percentage
- Individual trait scores remain visible for transparency
